

DECLARATION OF OUR ENVIRONMENTAL POLICY

Delta Tecnic, S.A. is a commercial company dedicated to commercialize and distribute in exclusive raw materials from important international companies for different sectors of the industry.

The objective of our Environmental Policy is to meet and improve if possible exigencies of the legislation and the norms in force in terms of protection to the Nature.

We will apply for the fulfilment of such objective, programs of Continuous Improvement in order to reduce the Environmental impact of our products and processes.

We will use the best technology possible whenever that it is economically viable, within the framework of the rules CE 761/2001 from the European Parliament and the Council, dated 19th March 2001 (EMAS).

To ensure the full appliance of the above explained, will be established the following principles of action:

- To promote at all levels between all the personnel of Delta Tecnic, S.A. the sense of the responsibility with relation to the protection of the Environment and the proposal of improvement objectives.
- Evaluate and supervise the repercussion on the Environment of our present and future activities.
- Will take the necessary steps to prevent and reduce the generation of residuum and emissions.
- Share with our suppliers and subcontractors the improvement of their Environmental Conditions on the products and processes they supply us.
- Will be established objectives and programs necessary to guarantee the prevention of the contamination and any emergency that can have negative repercussions on the Environment.
- Will collaborate with the public authorities on the establishment of urgency procedures to minimize the effect of accidents that affect the Environment.
- Supply our customers with suitable indications about the Environment effects relevant with relation to the handling, use and elimination of the products supplied by Delta Tecnic.

Salvador Torras
